* DIY paving is defined as shoulder to shoulder overlay on existing streets performed by city crews. For the purposes of this survey, it does **NOT** include paving maintenance such as pothole patching, repairing utility cuts, etc.

If the city **DOES** perform DIY paving:

| CITY | We analyzed cost benefits | DIY is cost effective for our city as compared to contracting | We purchased or leased major equipment | Maintenance of paving equipment is done in-house | We provide training for paving crews |
|-------------|----------------------------------|--|---|---|---|
| Chattanooga | | | X | X | |
| Memphis | | | | | |
| Nashville | X | X | X | X | X |
| Kingsport | X | X | X | X | X |

If the city does **NOT** perform DIY paving:

| City | DIY paving was not cost effective according to our analysis | Initial cost of equipment | Cost of maintaining paving equipment | Lack of adequate staffing | Lack of training for staff | Other - please specify |
|-------------|---|---------------------------|--------------------------------------|---------------------------|----------------------------|--|
| Alcoa | X | X | | | | |
| Sevierville | X | X | X | | X | We do some in-house work, but contract the bulk. We do small jobs and patches. |
